PREFACE

FM 101-10-1 consists of two volumes. This first volume provides planning data for commanders and staff officers (planners) at all echelons. These planning data pertain to table(s) of organization and equipment (TOEs) and standard requirement codes (SRCs) which are limited to divisions, armored cavalry regiments, separate brigades, and airborne special forces groups. Volume II contains planning factors for engineer, supply, transportation and movement, personnel services, health services, and operational force requirements. Data pertaining to corps and theater Army units' TOEs are in FM 101-10-2.

The cutoff date for the organizational data in this volume is August 1985. These data are not intended to provide complete or exhaustive coverage of personnel or equipment. This revised manual includes the latest approved J-series TOEs; TOE series used are indicated to permit the user to make adjustments, when such adjustments are required. Each major unit is presented in numerical sequence by TOE or SRC as a subtable of contents in each chapter. Each chapter in this volume consists of three sections: Section I, Organizational Structure; Section II, Personnel Summary; and Section III, Equipment Summary.

Unless otherwise stated, whenever the masculine gender is used, both men and women are included in the reference.

The proponent of this publication is HQ TRADOC. Submit changes for improving this publication on DA Form 2028 (Recommended Changes to Publications and Blank Forms) and forward it to the Commandant, US Army Command and General Staff College, ATTN: ATZL-SWA-DL, Fort Leavenworth, KS 66027.

INTRODUCTION

This volume is to be used as a planning guide only. Detailed reference data are found in TOEs, field manuals (FMs), technical manuals (TMs), technical bulletins, and supply bulletins as outlined in the DA Pamphlet 310-series. The principles and procedures of combat service support are contained in FM 100-10; the duties of staff officers and the principles and procedures of staff operations are contained in FM 101-5; the operational guidance for commanders and staff officers at all echelons is in FM 100-5. FM 100-5 is the foundation of Army service schools' curricula and serves as the basis for developing Army doctrine, training, planning, and materiel systems and organizations. Acronyms and abbreviations used in this FM can be found in AR 310-50.

The force structure has changed. This FM contains units designed under the H-series TOE (ROAD design) and J-series TOE (Army 86 and Army of Excellence designs). Since 1980, numerous J-series TOEs have been published. Many of these new TOEs are under revision (e.g., heavy division, air assault division, light division). To enable tracking of these organizations and to ensure mutual understanding, the following terms are used:

TYPE	DESIGN	EQUIPMENT	REMARKS
H	ROAD	Old	Current H-series TOE
Jt	Army 86	Old	J-series Army 86 design with old equipment
Jo	Army 86	New	J-series objective Army 86 with new equipment
Jft	Army of Excellence (AOE)	Old	J-series transition TOE AOE design with old equipment
Jf	Army of Excellence (AOE)	New	J-series final TOE AOE design with new equipment

For example, a unit of the heavy division could be described as Jft; that is, an organization in transition from its present configuration Jo (Army 86 design) to the Jf (AOE design).

The SRC is a nine-position code that is integral to each current TOE and expresses each and every possible combination or variation. SRCs are used throughout Volume I of this manual and FM 101-10-2 to be employed as a quick reference to identify specific units, personnel, and equipment. SRCs are also used to identify planning factors and combat service support requirements which are in Volume II of this FM. When associated with organizational data, the SRC consists of —

- A base number, which is a two-position number that indicates the branch or major subdivision of the TOE (AR 310-2). The most commonly used numbers are indicated below:

SERIES	TITLE
01	Aviation
03	Chemical
05	Engineers
06	Field Artillery
07	Infantry
08	Medical
09	Ordnance

• A subnumber, which is a three-position number that indicates the organizational elements of the branch or major subdivision of the TOE (AR 310-2). Normally, the last digit of the number indicates the type of organization as shown by the following:

1 Corps or similar organization.

2 Brigade, group, regiment, or similar organization headquarters and headquarters company.

4 Division, headquarters and headquarters company, and some separate companies.

5 Battalion or similar organization.

6 Battalion or similar organizational headquarters and headquarters company.

3, 7, 8, 9 Company or similar organization.

0 Other; for example, a subnumber (500, 510, 600) identifies cellular TOE.

• A suffix, which is an alphabetic character of one position indicating the revision series ("J" is latest series).

• A year designation which is a one-position numeric code derived from the last digit of the year of publication; for example, 1985 would be coded "5."

• A variation, which is a two-position alpha or numeric code that indicates differences that apply to the organizational elements of the TOE, such as cells in cellular TOEs and other table variations. Standard tables, without variations applied, are coded "00" (numeric). Elements of cellular tables will be two-letter identifications. Tables will be identified by alpha codes (AA, BB, etc) for each variation of the table.

The following are sample SRCs:

• SRC 06447J300. Base number "6" identifies the branch as field artillery. Subnumber "447" further identifies the table as a field artillery battery, 203-mm, self-propelled. Suffic "J" identifies the current publication cycle or revision series. Year "3" identifies the year (1983) in which the table was published. Variation "00" identifies a standard table without variation.

• SRC 17057J310. Base number "17" identifies the branch as armor. Subnumber "057" further identifies the table as an armored cavalry troop, armored cavalry squadron. Suffix "J" identifies the current publication cycle or revision series. Year "3" identifies the year (1983) in which the table was published. Variation "10" indicates a variation for an armored cavalry troop when equipped with main battle tank M60/M113. The variation "20" indicates an armored cavalry troop when equipped with main battle tank M1/M3.

CHAPTER 1

HEAVY DIVISION (ARMORED AND MECHANIZED)

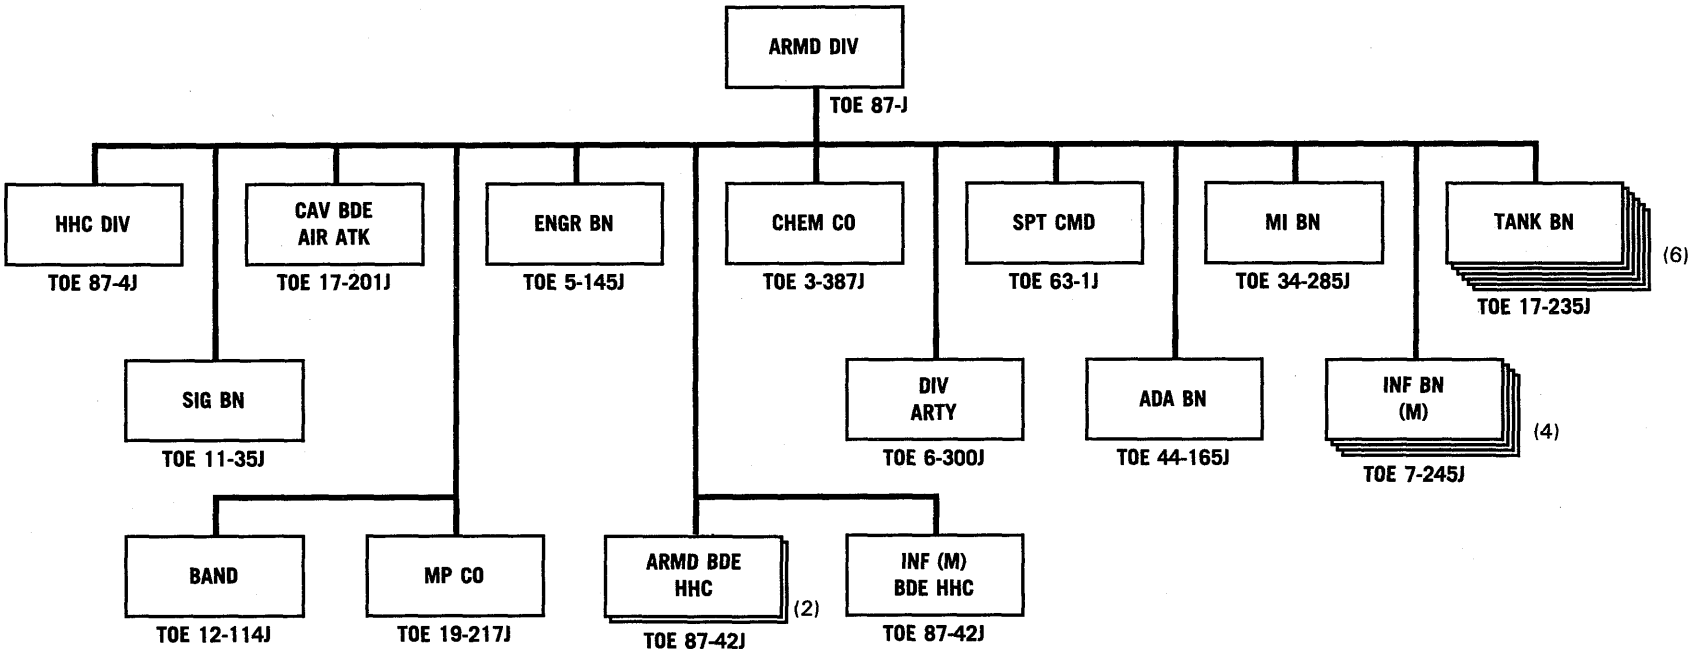

THIS CHAPTER PRESENTS DATA ON THE ORGANIZATIONAL STRUCTURE, PERSONNEL, AND SELECTED ITEMS OF EQUIPMENT IN THE HEAVY DIVISION (ARMORED AND MECHANIZED) AND SUBORDINATE ELEMENTS. THESE TYPES OF DIVISIONS HAVE A DIVISION BASE AND TEN MANEUVER BATTALIONS.

THE HEAVY DIVISIONS HAVE LARGE AMOUNTS OF MOBILE, ARMOR-PROTECTED FIREPOWER. BECAUSE OF MOBILITY, SURVIVABILITY, AND FIREPOWER, THE HEAVY DIVISIONS ARE NORMALLY EMPLOYED WHERE BATTLES ARE FOUGHT OVER WIDE AREAS AGAINST A THREAT WITH SIMILAR CAPABILITIES. DURING OFFENSIVE OPERATIONS, HEAVY DIVISIONS MOVE RAPIDLY, CONCENTRATE OVERWHELMING COMBAT POWER AGAINST THE THREAT, BREAK THROUGH THE THREAT'S DEFENSES, AND THEN STRIKE DEEP TO DESTROY THE THREAT'S FIELD ARTILLERY, COMMAND AND CONTROL, AND COMBAT SERVICE SUPPORT CAPABILITIES.

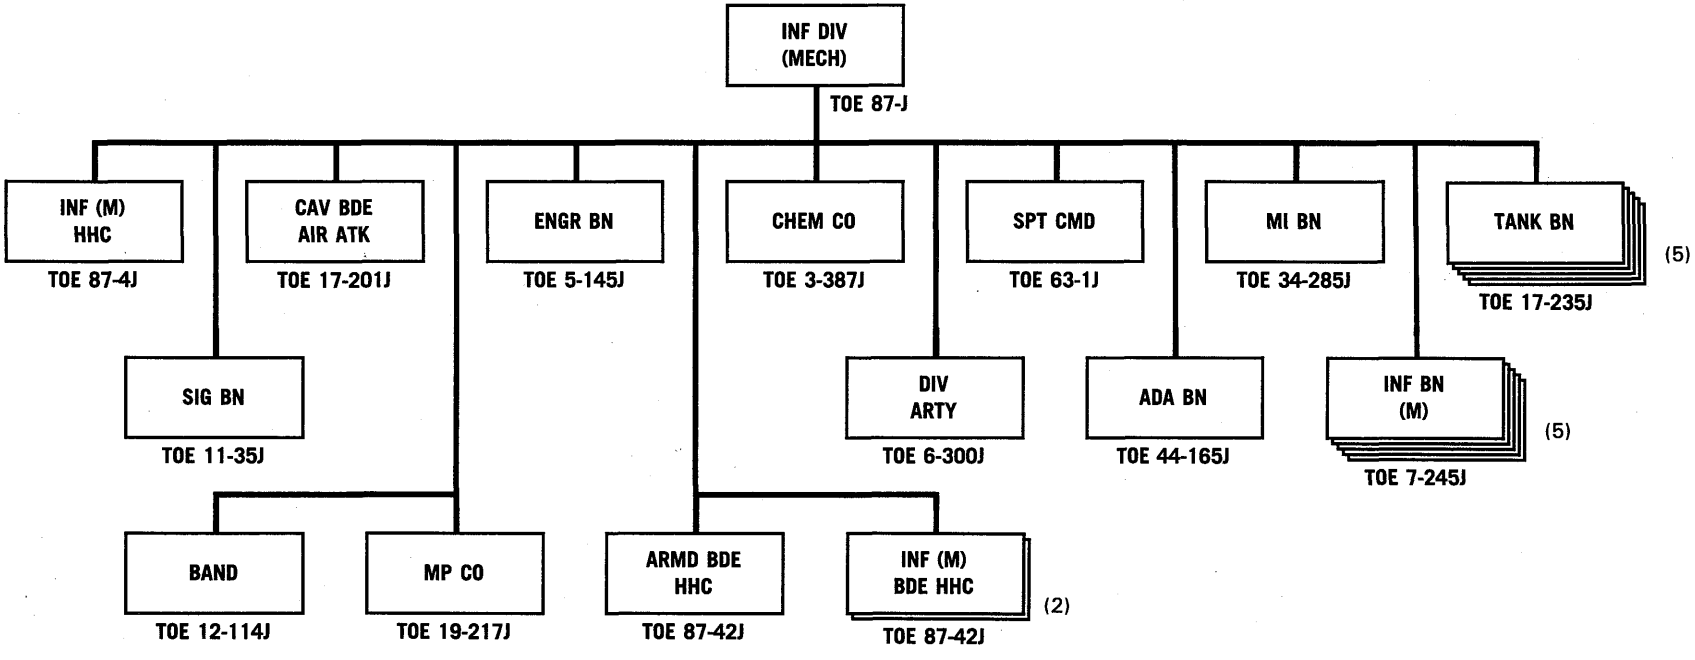

THE HEAVY DIVISIONS OPERATE BEST IN OPEN TERRAIN WHERE THEY CAN MOVE QUICKLY AND CAN USE THEIR LONG-RANGE, DIRECT FIRE WEAPONS TO THEIR BEST ADVANTAGE. THE HEAVY DIVISIONS ARE NOT DESIGNED TO OPERATE IN JUNGLES, DENSE FORESTS, OR MOUNTAINS. (INFANTRY IS MOST OFTEN USED IN THESE AREAS.) LARGE CITIES, TOWNS, AND BUILT-UP AREAS RESTRICT OPERATIONS OF THE HEAVY DIVISIONS; ALTHOUGH IN EUROPE, THESE DIVISIONS WILL HAVE TO OPERATE IN BUILT-UP AREAS FROM TIME TO TIME.

CHAPTER 3

AIR ASSAULT DIVISION

THIS CHAPTER PRESENTS DATA ON THE ORGANIZATIONAL STRUCTURE, PERSONNEL, AND SELECTED ITEMS OF EQUIPMENT OF THE AIR ASSAULT DIVISION AND SUBORDINATE ELEMENTS. THIS TYPE OF DIVISION HAS A DIVISION BASE AND NINE MANEUVER BATTALIONS.

THIS DIVISION CONDUCTS AIR ASSAULT OPERATIONS BY TRANSPORTING INFANTRY AND FIELD ARTILLERY BATTALIONS WITH THE NECESSARY COMBAT SUPPORT AND COMBAT SERVICE SUPPORT INTO BATTLE BY HELICOPTER. ONCE DEPLOYED ON THE GROUND, AIR ASSAULT INFANTRY BATTALIONS FIGHT LIKE THOSE OF THE INFANTRY DIVISION; HOWEVER, NORMAL TASK ORGANIZATION OF ORGANIC AVIATION PERMITS RAPID AERIAL REDEPLOYMENT. THE ESSENCE OF AIR ASSAULT TACTICS IS RAPID TEMPO OF OPERATIONS OVER EXTENDED RANGES.

CHAPTER 4

AIRBORNE DIVISION

THIS CHAPTER PRESENTS DATA ON THE ORGANIZATIONAL STRUCTURE, PERSONNEL, AND SELECTED ITEMS OF EQUIPMENT IN THE AIRBORNE DIVISION AND SUBORDINATE ELEMENTS. THIS TYPE OF DIVISION HAS A DIVISION BASE AND NINE MANEUVER BATTALIONS.

THE AIRBORNE DIVISION IS ORGANIZED TO BE RAPIDLY DEPLOYED ANYWHERE IN THE WORLD TO —

- SECURE CRITICAL INSTALLATIONS OR FACILITIES.
- REINFORCE US AND ALLIED FORCES.
- CONDUCT A SHOW OF FORCE.

THIS DIVISION CAN CONDUCT A PARACHUTE ASSAULT IN THE THREAT'S REAR TO SECURE TERRAIN OR TO INTERDICT ROUTES OF RESUPPLY OR THREAT WITHDRAWAL. IT CAN ALSO BE AIRLANDED. IT CAN CONDUCT AIR ASSAULT OPERATIONS AS WELL AS OTHER MISSIONS NORMALLY ASSIGNED TO INFANTRY DIVISIONS.

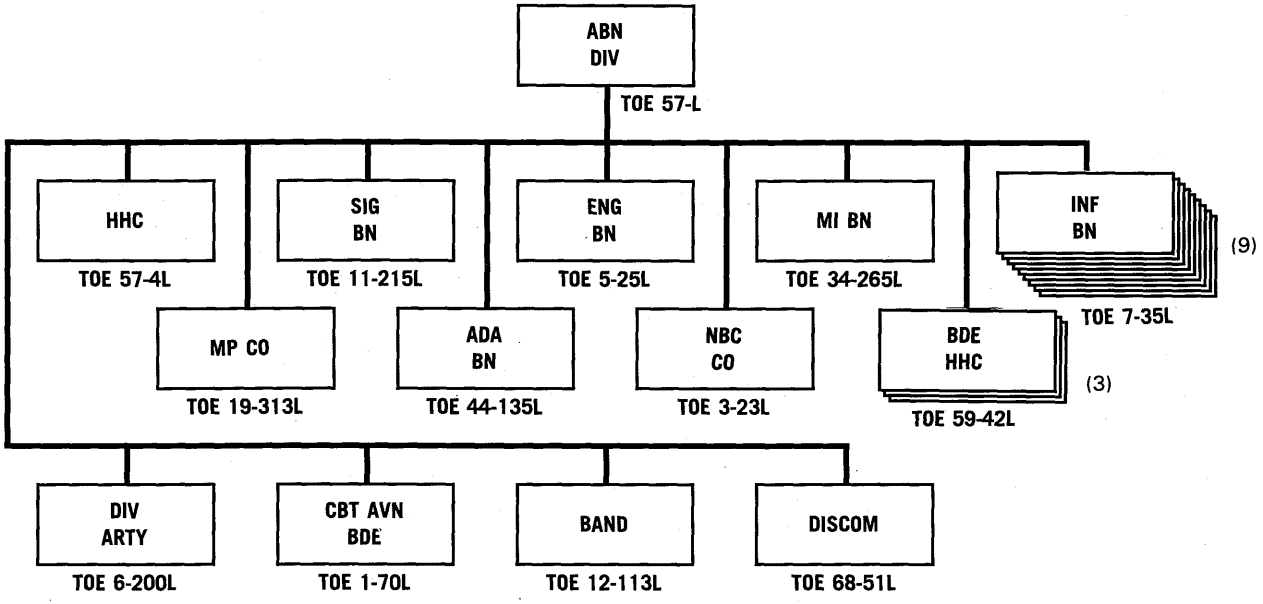

AIRBORNE OPERATIONS ARE MOST OFTEN JOINT OPERATIONS WITH THE US AIR FORCE. THE US AIR FORCE PROVIDES THE AIRLIFT, CLOSE AIR SUPPORT, AND AERIAL RESUPPLY FOR THE AIRBORNE FORCES. NORMALLY, UNITS PARTICIPATING IN AN AIRBORNE OPERATION ARE ASSIGNED TO A JOINT TASK FORCE. AIRBORNE OPERATIONS MAY BE SUPPORTED BY NAVAL AIR AND NAVAL GUNFIRE IF THE OPERATIONAL AREA IS WITHIN RANGE. AIRBORNE OPERATIONS ARE GENERALLY EXECUTED IN TWO PHASES: ASSAULT AND DEFENSE.

IN THE ASSAULT PHASE, US AIR FORCE AIRCRAFT TRANSPORT DIVISION UNITS TO THE OPERATIONAL AREA TO CONDUCT A PARACHUTE ASSAULT. BEFORE AND DURING THE ASSAULT, SUPPORTING FIRES ARE DELIVERED BY CLOSE AIR SUPPORT, NAVAL GUNFIRE, OR BOTH. AFTER THE PARACHUTE ASSAULT, UNITS ASSEMBLE AND SEIZE ASSAULT OBJECTIVES. ARTILLERY BEGINS PROVIDING FIRE SUPPORT AS SOON AS POSSIBLE AFTER LANDING. CLOSE AIR SUPPORT CONTINUES WITH PRIORITY TO ARMOR AND TARGETS BEYOND ARTILLERY RANGE. ADDITIONAL UNITS ARE AIRLANDED AS LANDING ZONES ARE SECURED.

THE DEFENSE PHASE BEGINS WHEN ASSAULT OBJECTIVES ARE SEIZED. AN ALL-GROUND DEFENSE IS ORGANIZED WHEN THE FORCE IS IN THREAT-OCCUPIED TERRITORY. THE DIVISION MASSES AND THEN CONDUCTS OPERATIONS IN THE SAME MANNER AS THE INFANTRY DIVISION. AIRBORNE OPERATIONS USUALLY END ON LINKUP OR EXTRACTION OF THE DIVISION.

CHAPTER 5

ARMORED CAVALRY REGIMENT

THIS CHAPTER PRESENTS DATA ON THE ORGANIZATIONAL STRUCTURE, PERSONNEL, AND SELECTED ITEMS OF EQUIPMENT ON THE ARMORED CAVALRY REGIMENT. NORMALLY, AN ARMORED CAVALRY REGIMENT IS ASSIGNED TO CORPS HEADQUARTERS. THE REGIMENT'S BASIC TASKS ARE RECONNAISSANCE AND SECURITY. THESE TASKS ARE ACCOMPLISHED THROUGH COMBINED ARMS ACTION AT ALL LEVELS FROM THE SCOUT TEAM THROUGH THE REGIMENT. TO ACCOMPLISH ITS MISSION, THE REGIMENT MUST FREQUENTLY DESTROY SUFFICIENT THREAT FORCES TO CAUSE THE THREAT TO BREAK OFF AN ATTACK, TO GIVE UP A DEFENSIVE AREA, OR TO MOVE FORWARD OR AWAY FROM AN AREA VITAL TO FRIENDLY FORCES. THEREFORE, MORE OFTEN THAN NOT, A CAVALRY REGIMENT WILL HAVE TO FIGHT TO ACCOMPLISH ITS MISSION. TO MOVE TO SEE THE THREAT AND TO MOVE TO FIGHT THE THREAT, THE REGIMENT MUST SUPPRESS THOSE THREAT WEAPONS THAT CAN HINDER ACCOMPLISHMENT OF THE CAVALRY MISSION. FIELD AND AIR DEFENSE ARTILLERY, ATTACK HELICOPTERS, AND US AIR FORCE TACTICAL FIGHTER BOMBERS MUST BE ORGANIZED AND EMPLOYED TO PROVIDE SUFFICIENT SUPPRESSION TO ENABLE THE CAVALRY TO MOVE.

THE ARMORED CAVALRY REGIMENT MAY BE REINFORCED WITH MANEUVER BATTALIONS, TASK FORCES, OR UNITS OF AIR DEFENSE ARTILLERY, FIELD ARTILLERY, ENGINEER, MILITARY INTELLIGENCE, ARMY SECURITY AGENCY, SIGNAL, ARMY AVIATION, AND COMBAT SERVICE SUPPORT. MANEUVER ELEMENTS MAY BE RETAINED UNDER REGIMENTAL CONTROL OR PLACED UNDER ONE OR MORE SQUADRONS. THE REGIMENT NORMALLY MAINTAINS UNITY OF COMMAND AND ORGANIZATIONAL INTEGRITY OF SQUADRONS, THE AIR CAVALRY TROOP, THE ATTACK HELICOPTER TROOP, AND THE ATTACKED OR SUPPORTING UNITS BY CENTRALIZED PLANNING AND DECENTRALIZED EXECUTION. USUALLY HEADQUARTERS AND HEADQUARTERS TROOP IS USED TACTICALLY IN TWO ECHELONS: COMMAND POST AND TRAINS. THE REGIMENTAL COMMANDER CONTROLS AND COORDINATES OPERATIONS USING A TACTICAL COMMAND POST OR MAIN COMMAND POST.

SPECIFICALLY, THE ARMORED CAVALRY REGIMENT —

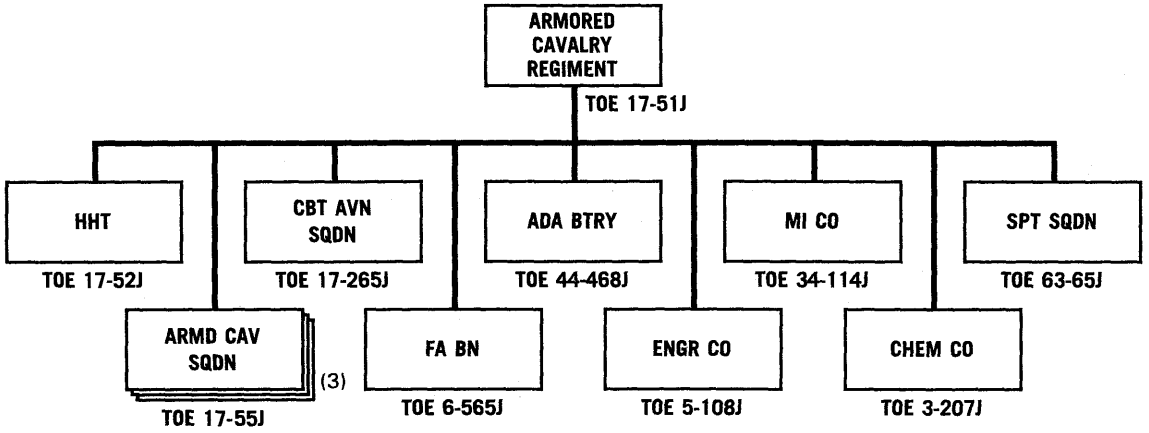

- CONDUCTS GROUND AND AERIEL RECONNAISSANCE OVER WIDE FRONTS AND TO EXTENDED DEPTHS.
- COLLECTS AND REPORTS INFORMATION OF INTELLIGENCE VALUE TO INCLUDE THREAT MOVEMENT, DISPOSITION OF TYPES OF FORCES AND EQUIPMENT, NUCLEAR TARGET INFORMATION, AND NUCLEAR DAMAGE ASSESSMENT.
- CONDUCTS RADIOLOGIC MONITORING AND SURVEY.
- PROTECTS THE FLANK OR FLANKS OF THE CORPS.
- PROVIDES SECURITY BETWEEN CORPS ELEMENTS OR BETWEEN THE CORPS AND ADJACENT UNITS.
- SERVES AS A CORPS COVERING FORCE IN BOTH OFFENSIVE AND DEFENSIVE OPERATIONS.
- PROVIDES ECONOMY OF FORCE.
- CONTROLS HASTY ATTACKS, NORMALLY AS A PART OF RECONNAISSANCE AND SECURITY OPERATIONS.
- CONDUCTS DELIBERATE ATTACKS.
- PARTICIPATES IN EXPLOITATION AND PURSUIT OPERATIONS.
- CONDUCTS COUNTERATTACKS.
- SERVES AS A RESERVE FOR A DEFENDING CORPS.
- PROVIDES AERIAL ARMED ESCORT FOR AIR ASSAULT OPERATIONS.
- ENGAGES AND DESTROYS THREAT TANKS AT EXTENDED RANGES.

THE ARMORED CAVALRY REGIMENT HAS THE FOLLOWING MAJOR VULNERABILITIES:

- WHEN OPERATING OVER EXTENDED FRONTS AND DEPTHS, SQUADRONS, TROOPS, PLATOONS, SQUADS, AND SECTIONS MAY BECOME ISOLATED, CUT-OFF, AND NEUTRALIZED.
- OPERATIONS OF REGIMENTAL AIR ASSETS ARE WEATHER DEPENDENT.

CHAPTER 6

INFANTRY DIVISION (MOTORIZED)

THIS CHAPTER PRESENTS DATA ON THE ORGANIZATIONAL STRUCTURE, PERSONNEL, AND SELECTED ITEMS OF EQUIPMENT IN THE INFANTRY DIVISION (MOTORIZED).

THE INFANTRY DIVISION (MOTORIZED) WAS ORGANIZED TO MEET THE SECURITY DEMANDS OF THE DYNAMIC AND POTENTIALLY VOLATILE INTERNATIONAL ENVIRONMENT, AND TO BE HIGHLY FLEXIBLE AND STRATEGICALLY RESPONSIVE ACROSS A BROAD SPECTRUM OF CONFLICT. IT IS ORGANIZED, EQUIPPED, AND TRAINED FOR COMBAT IN DESERT AND ARID MOUNTAINOUS AREAS AND IT RETAINS THE UTILITY TO RESPOND TO APPROPRIATE MISSIONS IN NATO OR TO PROVIDE INCREASED MOBILITY AND FIREPOWER IN A LOW-INTENSITY CONFLICT.

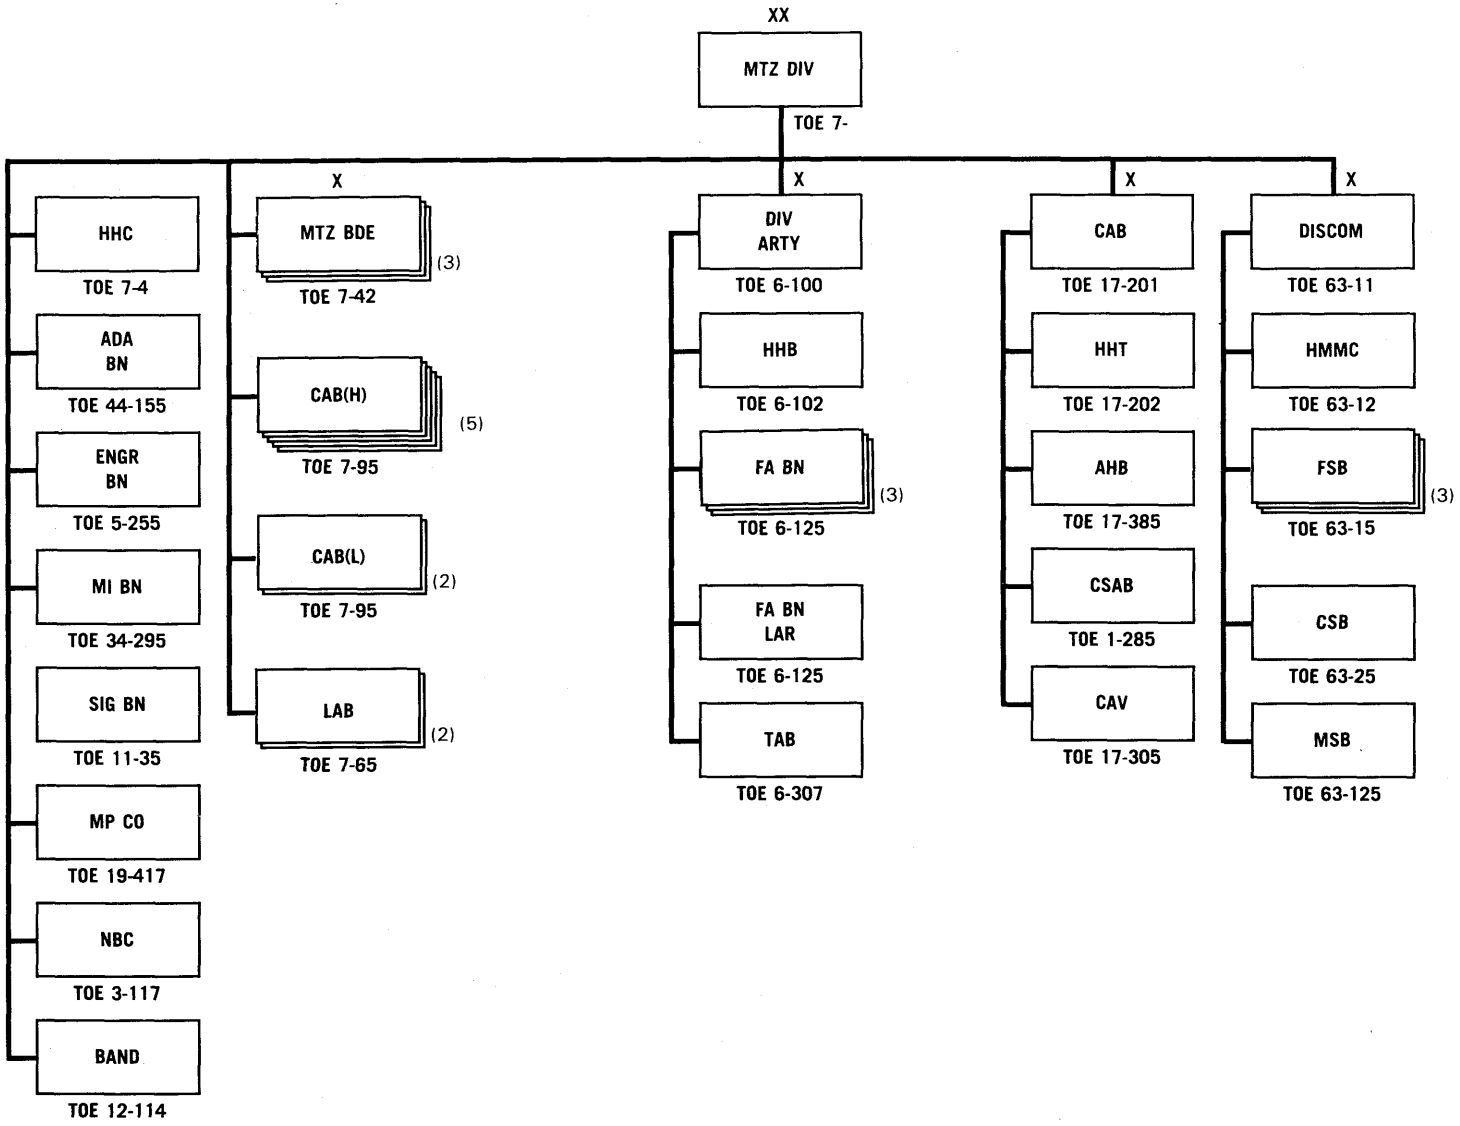

THE INFANTRY DIVISION (MOTORIZED) IS A LETHAL, FLEXIBLE, AND VERSATILE FIGHTING FORCE CAPABLE OF RESPONDING QUICKLY TO CRISIS SITUATIONS. THE DIVISION IS ORGANIZED FOR RESPONSIVE DEPLOYMENT, IMMEDIATE COMBAT OPERATIONS UPON ARRIVAL IN ANY CONFLICT ENVIRONMENT, AND QUICK RETRIEVAL FROM THE OPERATIONAL AREA AFTER THE MISSION IS COMPLETED. TO MEET A WORST-CASE ARMORED THREAT, THE DIVISION IS ORGANIZED AROUND COMBINED ARMS BATTALIONS EQUIPPED WITH A SUBSTANTIAL NUMBER OF LONG-RANGE ANTI-ARMOR WEAPONS. THESE WEAPONS CAN BE MANEUVERED QUICKLY ABOUT THE INTEGRATED BATTLEFIELD USING ORGANIC AIR AND GROUND MOBILITY.

THE DIVISION MAINTAINS THE CAPABILITY TO SEE FAR ENOUGH INTO THE BATTLEFIELD TO EXECUTE OPERATIONS AND INFLUENCE THE AIRLAND BATTLE. IT ACHIEVES MAXIMUM COMBAT EFFECTIVENESS, INCLUDING SURVIVABILITY, THROUGH FORCE MOBILITY, SYSTEM AGILITY, DISTRIBUTION OF COMMAND AND CONTROL, AND FORCE-ORIENTED TACTICS EMPHASIZING INDIRECT APPROACHES AND STAND-OFF ATTACKS. TO ENSURE SURVIVABILITY, THE DIVISION HABITUALLY OPERATES WIDELY DISPERSED AND RELIES ON DECEPTION TO MASK ITS LOCATION AND INTENTIONS. SUCH DISPERSION AND THE NATURE OF THE MANEUVER BATTLE REQUIRES THAT MOTORIZED UNITS BE ORGANIZED ON A COMBINED ARMS BASIS. THE DIVISION CAN BE DEPLOYED IN CONJUNCTION WITH HEAVY DIVISIONS AND MAY BE EMPLOYED IN AN ECONOMY OF FORCE ROLE, THEREBY FREEING HEAVY UNITS TO CONDUCT OTHER MISSIONS. THE DIVISION CAN ALSO ACCEPT AIR ASSAULT, AIRBORNE, INFANTRY, AND ARMOR UNITS WITH APPROPRIATE COMBAT SUPPORT (CS) AND COMBAT SERVICE SUPPORT (CSS) SLICES.

THE DIVISION IS CAPABLE OF OPERATING ON A NUCLEAR OR CHEMICAL BATTLEFIELD. IT HAS ESSENTIAL CSS CAPABILITIES TO OPERATE FOR UP TO 72 HOURS, EXCEPT FOR HAVING WATER IN ARID ENVIRONMENT AND CLASS V (ARTILLERY) IN HIGH-INTENSITY CONFLICTS
