SECTION I

INTRODUCTION

1-1. Scope

This manual contains a list of repair parts required for the performance of organizational maintenance for Radio Terminal Set AN/TRC-80, AN/TRC-80A, and AN/TRC-80B.

1-2. General

This repair parts list is divided into the following sections:

a. Prescribed Load Allowance (PLA), Section II. Not applicable.

b. Special Tools, Test and Support Equipment for Organizational Maintenance, Section III. Not applicable.

c. Repair Parts for Organizational Maintenance, Section IV. Repair parts authorized for organizational maintenance are included in this section.

NOTE

All indexes noted below are cross-referenced to index numbers. The index numbers appear in ascending sequence in column 1 of the repair parts list (para 1-2*c*). The index number for the particular item will be the same for the item in all sections of this publication.

d. Index-Federal Stock Number Cross-Reference to Index Number, Section V. A list of Federal stock numbers in ascending numerical sequence cross referenced to index numbers.

e. Index-Reference Number and Manufacturer's Code Cross-Reference to Index Number, Section VI. A list of reference numbers (manufacturer's part number) appearing in ascending alphanumeric sequence and manufacturer's code cross-referenced to index number.

f. Index-Reference Designation Cross-Reference to Index Number, Section VII. A list of reference designations cross-referenced to index numbers.

1-3. Explanation of Columns

An explanation of the columns in section IV is given below.

a. Source, Maintenance, and Recoverability Codes (SMR), Column 1.

(1) *Source code.* The selection status and source for the listed item is noted here. Source codes and their explanations are as follows:

Code	*Explanation*
P	Applies to repair parts which are stocked in or supplied from the GSA/DSA or Army supply system and authorized for use at indicated maintenance categories.
A	Applies to assemblies which are not procured or stocked as such, but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately, and can be assembled to form the required assembly at indicated maintenance categories.
M	Applies to repair parts which are not procured or stocked, but are to be manufactured at indicated maintenance categories.
X2	Applies to repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain same through cannibalization. Where such repair parts are not obtainable through cannibalization, requirements will be requisitioned, with accompanying justification, through normal supply channels.
G	Applies to major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above DS and GS level or returned to depot supply level.

(2) *Maintenance code.* The lowest category of maintenance authorized to install the listed item is noted here.

Code	*Explanation*
O	Organizational maintenance

(3) *Recoverability code.* The information in this column indicates whether unserviceable

items should be returned for recovery or salvage. Recoverability codes and their explanations are as follows:

NOTE

When no code is indicated in the recoverability column, the part is considered expendable.

Code *Explanation*

R—Applies to repair parts and assemblies that are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis.

S—Applies to repair parts and assemblies that are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis. When items are determined by GSU to be uneconomically repairable, they will be evacuated to a depot for evaluation and analysis before final disposition.

T—Applies to high dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities.

b. Index Number, Column 1. The applicable index number appears in this column. The line item index numbers appear in the SMR code column directly under the code letters for each item. The index number for an item is the same for that item in all repair parts lists for this equipment. Index numbers appear in ascending sequence, but the sequence may not be continuous for all items as a result of items being removed from the system or allocated only to a higher category of maintenance.

c. Federal Stock Number, Column 2. The Federal stock number for the item is indicated in this column.

d. Description, Column 3. The Federal item name and any additional description of the item required, a 5-digit manufacturer's code, and a part number are included in this column. For subsequent appearances of the same item, the manufacturer's code and part number are omitted. The words SAME AS, followed by the index number as it first appeared in the list, follow the item name.

e. Unit of Issue, Column 4. The unit used as a basis of issue (e.g., ea, pr, ft, yd, etc.) is indicated in this column.

f. Quantity Incorporated in Unit, Column 5. The quantity of repair parts in an assembly is given in this column. Subsequent appearances of the same item in the same assembly are indicated by the letters "REF".

g. Maintenance Allowances, Column 6.

(1) The allowance columns are divided into subcolumns. Indicated in each subcolumn, opposite the first appearance of each item, is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item have no entry in the allowance columns but have a reference in the *Description* column to the first appearance of the item. Items authorized for use as required, but not for initial stockage, are identified with an asterisk (*) in the allowance column.

(2) The quantitative allowances for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units and organizations authorized additional prescribed loads will multiply the number of prescribed loads authorized by the quantity of repair parts reflected in the appropriate density column to obtain the total quantity of repair parts authorized.

(3) Organizational units providing maintenance for more than 100 of these equipments shall determine the total quantity of parts required by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51–100 allowance column. Example, authorized allowance for 51–100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

h. Illustrations, Column 7.

(1) *Figure number, column 7a.* The number of the illustration in which the item is shown and the maintenance level suffix number of the technical manual in which the illustration appears is indicated in this column. For example, if the illustration in which the item is shown is figure 13 of the operator manual (–10), the manual suffix –10 appears on the first line and the illustration number 13 on the second line.

(2) *Item number or reference designation, column 7b.* The reference designation used to identify the item in the illustration appears in this column.

1–4. Special Information

a. The following publications pertain to Radio Terminal Set AN/TRC–80, AN/TRC–80A, and AN/TRC–80B and their components:

TM 5–6115–299–20	Organizational Maintenance Manual: Generator Set, Gasoline Engine, 10 kw, ac, 120/208 v, 3 phase, 400 cycle; Skid Mounted (Bogue Electric Model 5380A) FSN 6115–855–9572.
TM 11–5805–246–20P	Organizational Maintenance Repair Parts and Special Tools Lists: Terminals, Telegraph TH–5/TG FSN 5805–246–8734) and TH–5A/TG (FSN 5805–020–5720).
TM 11–5815–206–20P	Organizational Maintenance Repair Parts and Special Tool Lists: Teletypewriter Set AN/PGC–1 and Teletypewriter TT–4A/TG, TT–4B/TG, TT–4C/TG, and TT–335/TG.
TM 11–5820–469–10	Operator's Manual: Radio Terminal Set AN/TRC–80B.
TM 11–5820–469–20	Organizational Maintenance Manual: Radio Terminal Set AN/TRC–80B.

b. The *Usable on code* column contains numeric codes that are used when the applicability of a part is limited to a given portion of the articles covered by the breakdown. The specific usage of usable on codes applicable to this publication is as follows.

Code	*Used on*
1	Radio Terminal Set AN/TRC–80
2	Radio Terminal Set AN/TRC–80A
12	Radio Terminal Set AN/TRC–80, AN/TRC–80A, and AN/TRC–80B
3	Radio Terminal Set AN/TRC–80B

c. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category (i.e., MD, AD).

1–5. Location of Repair Parts

a. This manual contains three cross-reference indexes (sec V, VI, and VII) to be used to locate a repair part when either the Federal stock number, reference number (manufacturer's part number), or reference designation is known. The first column in each index is prepared in numerical or alphanumeric sequence in ascending order. The last column of each cross-reference index lists the index number assigned to the part. Where a Federal stock number is not listed, refer to the reference number (manufacturer's part number) index (sec VI).

b. Refer to the appropriate cross-reference index (para 1–2*d*, *e*, and *f*) and note the index number in the last column; then refer to the repair parts list to locate the index number which is listed in ascending order in column 1 of the repair parts list (sec IV).

1–6. Federal Supply Codes

This paragraph lists the Federal supply code and the associated manufacturer's name.

Code	*Manufacturer*
02615	Nylok Co. The Div. of USM Corp. 611 Industrial Ave. Paramus, NJ 07652

1-7. Reporting of Equipment Publication Improvements

The reporting of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be submitted on DA Form 2028 (Recommended Changes to Publications) and forwarded direct to Commander, US Army Electronics Command, ATTN: AMSEL-MA-A, Fort Monmouth, NJ 07703.
